AI & Automation: AI Agent Development, Chatbot Development, n8n, Make, Zapier, API Integration

Other: Custom CRM Architecture, Performance Optimization, Git, Hosting & cPanel Management

PROFESSIONAL EXPERIENCE

WordPress / Full-Stack Developer | Devugo Tech • Pakistan | January 2025 – Present

- Lead end-to-end development of custom WordPress themes built from scratch using PHP, WordPress Template Hierarchy, and advanced hook/filter architecture.
- Developed custom WordPress plugins including Gutenberg blocks (React-based), admin dashboards, shortcodes, and widget APIs for diverse client requirements.
- Built complex WooCommerce solutions with custom product types, checkout flows, payment gateway integrations, and order management extensions.
- Architected WordPress REST API-powered headless setups integrated with React.js frontends for high-performance SaaS and e-commerce platforms.
- Delivered performance-optimized WordPress sites with advanced caching strategies, CDN integration, and Core Web Vitals improvements.
- Built and deployed AI agents and chatbots for lead generation and customer support using Python and OpenAI APIs integrated with WordPress.
- Implemented workflow automation pipelines using n8n, Make, and Zapier, reducing manual operations for clients by 60%+.

Freelance WordPress & Web Developer | Upwork • Remote | April 2022 – Present

- Delivered 30+ web development projects with a strong focus on custom WordPress theme and plugin development for international clients.
- Developed bespoke WordPress themes from Figma/XD designs, implementing pixel-perfect responsive layouts using PHP, CSS3, and JavaScript.

- Created custom WordPress plugins: booking systems, membership portals, review aggregators, directory listings, and multi-vendor WooCommerce setups.
- Performed WordPress site migrations, speed optimization, security hardening, and managed hosting configurations (cPanel, Nginx, Apache).
- Integrated third-party APIs (payment gateways, CRMs, email marketing tools) into WordPress and WooCommerce platforms.
- Built scalable REST APIs and backend systems using Node.js, Express.js, Laravel, and Django for projects beyond the WordPress ecosystem.

Web Developer | CodeDeskStudio • Pakistan | March 2023 – September 2023

- Developed and maintained full-stack web applications for agency clients using WordPress, React.js, Node.js, and Laravel.
- Built custom WordPress themes and plugins aligned with client brand guidelines, collaborating closely with design teams using Figma prototypes.
- Implemented responsive, accessible UI/UX using Tailwind CSS and WordPress block-based theme development.
- Integrated third-party APIs and payment gateways (Stripe, PayPal) into WordPress and WooCommerce stores.

KEY COMPETENCIES

Custom WordPress Development: Theme development from scratch, child theme creation, template hierarchy mastery, and hook/filter system expertise.

Plugin Architecture: End-to-end custom plugin development including Gutenberg blocks, REST API endpoints, admin UIs, and third-party integrations.

WooCommerce Specialist: Custom extensions, payment gateway integrations, multi-vendor setups, and conversion rate optimization for e-commerce stores.

SaaS & Full-Stack: MVP architecture to full production deployment using MERN Stack and Laravel with scalable, growth-ready infrastructure.

AI & Agentic Systems: Design and deployment of AI agents, LLM-powered chatbots, and intelligent workflow automation integrated with WordPress.
